EFEZINO TAIGBENU

Backend & Mobile Software Engineer

Lagos, Nigeria | +234 902 105 1844 | taigbenuefezino@gmail.com | linkedin.com/in/efezino-taigbenu-8a769a285 | github.com/Zinolesky | portfolio-mu-one.vercel.app

PROFESSIONAL SUMMARY

Backend and Mobile Software Engineer specializing in **Python (FastAPI, Django)**, **.NET 8 (C#, ASP.NET Core)**, **Go**, and cross-platform mobile development (**React Native, Flutter**). Experienced in architecting offline-first retail and mobile systems, containerized microservices with Docker, spatial and embedded databases (PostgreSQL, PostGIS, SQLite WAL, JSI SQLite), and production generative AI workflows.

TECHNICAL SKILLS

Languages: Python, C#, Go, Kotlin, Dart, TypeScript / JavaScript, SQL
Backend & Desktop: FastAPI, Django, ASP.NET Core (.NET 8), Entity Framework Core 8, WPF (MVVM), Flask, REST APIs, Microservices Architecture
Mobile & Cross-Platform: React Native, Flutter, CustomPainter, Android Native Modules (Kotlin), React Native for Web (PWA)
Databases & Spatial: PostgreSQL 16, PostGIS (GiST Spatial Indexing), SQLite (WAL Mode), JSI SQLite
Cloud, DevOps & Testing: Docker, Docker Compose, Vercel, Railway, pytest, Automated Testing & Test Harnesses, Git, GitHub
AI, Security & Hardware APIs: Google Gemini API, PyMuPDF, Google Maps API, Argon2id & Windows DPAPI, ESC/POS & USB HID
Productivity & Tools: Microsoft Office (Excel, Word, PowerPoint), Google Workspace, Antigravity IDE, VS Code, Android Studio

SOFTWARE ENGINEERING PROJECTS

Prime Supermarket POS (v2.2) — Hybrid Offline-First Retail System [GitHub] November 2026
.NET 8 (C#), WPF (MVVM), ASP.NET Core Minimal APIs, EF Core 8, SQLite (WAL), PostgreSQL 16, Docker Compose
- Engineered an enterprise offline-first retail POS terminal in .NET 8 achieving sub-15ms local authentication and zero local data loss by implementing Argon2id + Windows DPAPI credential caching, automated SQLite WAL hot backups, and containerized ASP.NET Core sync.
- Guaranteed reliable offline sales synchronization without transaction drops by building a bidirectional Outbox engine featuring idempotent replication, exponential retry backoff (1s–64s), and a Dead-Letter Queue (DLQ).
- Eliminated checkout bottlenecks and cash reconciliation discrepancies by implementing GS1 variable-measure EAN-13 barcode parsing, raw ESC/POS thermal receipt spooling (winspool.Drv / TCP 9100), and blind Z-Report shift till audits.

Distributed Anti-Spam Call Screening Application (HushLine) [Live Docs] October 2026
React Native, Kotlin, JSI SQLite, Python (FastAPI), Go, Docker Compose
- Enabled isolated multi-service deployment and horizontal scalability by architecting a containerized microservices backend using Python FastAPI and Go orchestrated via Docker Compose.
- Intercepted and evaluated incoming caller metadata in real time by engineering native Android `CallScreeningService` modules in Kotlin bridged to a React Native frontend.
- Achieved sub-millisecond (<1ms) local caller reputation lookups on-device by integrating JSI SQLite for high-speed offline database querying.

Mobile Campus Navigation System (Final Year Project) [GitHub] June 2026
React Native, Django REST Framework, PostgreSQL, PostGIS, Google Maps API
- Delivered dynamic venue discovery and turn-by-turn routing across Bowen University campus by engineering a full-stack mobile spatial application in React Native and Django.
- Reduced spatial search latency to under 150ms average response time by architecting a PostgreSQL database with PostGIS GiST spatial indexing exposed via scalable Django REST endpoints.
- Rendered interactive real-time venue markers, proximity filtering, and polyline navigation paths by integrating Google Maps APIs with React Native.

AI-Powered Universal PDF Auto-Filler (Progressive Web App) October 2026
React Native for Web (PWA), Python (FastAPI), PyMuPDF, Google Gemini API
- Cut repetitive manual contract completion overhead by an estimated 90% by architecting a cross-platform PWA that automates complex form completion across user-uploaded PDFs.
- Extracted and mapped unstructured client data onto structured document fields with zero coordinate drift by integrating the Google Gemini API with a FastAPI backend and PyMuPDF coordinate stamping.

ChatFlow — Video-First Social Media Application October 2026
React Native, TypeScript
- Delivered seamless continuous video playback between direct-message (DM) playlists and discovery feeds by developing a hybrid Reel-style mobile engine in React Native.
- Achieved low-latency, stutter-free vertical feed navigation by engineering gesture-driven viewport video pre-buffering and smooth state transitions.

Flutter 2D Football Tactical Whiteboard July 2026
Flutter, Dart, CustomPainter
- Enabled real-time pitch strategy visualization at a smooth 60 FPS by engineering a custom 2D canvas simulation tool using Flutter's native `CustomPainter` API and interactive token gestures.

The Road to Python — Interactive Curriculum Platform [GitHub | Live] October 2026
Python, Django, Vercel
- Delivered an interactive programming curriculum across 9 progressive skill phases by building and deploying a full-stack Django platform with automated CI/CD on Vercel.

WORK EXPERIENCE

Pufferfish Technology Limited — Lekki, Lagos State July – September 2024
Industrial Training Intern, HR & Administration
- Maintained 100% data accuracy across 100+ master employee datasets by engineering structured spreadsheet workflows with automated validation rules.
- Reduced cross-departmental record request turnaround time by 25% by automating document tracking and reporting pipelines.
- Standardized digital record-keeping schemas across HR systems and delivered weekly quantitative audit reports for senior management.

EDUCATION & CERTIFICATION

Bowen University — Iwo, Nigeria Graduated June 2026
Bachelor of Science in Computer Science
- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, System Architecture, Operating Systems, Compiler Design, Object-Oriented Programming, Artificial Intelligence.

New Horizons Nigeria — Certificate of Completion Credential: NHN 148044
Machine Learning, Python Programming, Web Frontend & Web Backend
